NEW - Heavy Duty Brake Drum Option:

NEW!

1302884 Hub-pilot, balanced, 1" drilled hole, 114 lbs.
Similar to Webb 66884B. KIC # is 53033-018.

The iron for this brake drum is ASTMA-159 (Grade G3500b) which exceeds the industry standard in durability and drum life.

This drum is "up to the STOMP!" It has been put through durability testing using high deceleration stops - the type where the tires skid - the type that truckers only have to make 2 to 6 times a year. The drum was pounded with stop after stop, at high speeds, until it broke... 310 stops!; that is equal to over 50 years of on-the-road panic stops.

Lastly - one of the real keys for severe service application brake drums involves brake shoes. Heavier drum-longer life and that means getting 2 sets of brake shoes per drum, versus one set in the lighter weight drums. Many fleets are going to this type of brake drum for this reason!
